HOW TO DOWNLOAD MP3 AUDIO CONTENT FROM A VIDEO

Dear Friends

Many of you have faced challenges in playing my youtube videos or other youtube videos due to buffering challenges, mainly caused by slow or erratic internet speeds.

The purpose is to listen to the audio interrupted.

There is a way you can do this. For this you need to download only the AUDIO content of a video file as a mp3 file to your computer so you can play it on your computer, using your computer resources and NOT internet.

For this please follow the following instructions. This will help you not only to download my videos as audio files but also movie songs. You can then burn the audio on a CD and create an audio CD,

- 1) Please go to youtube for the video of your choice. Then copy the address link on the address bar by right clicking on the address bar

<http://www.youtube.com/watch?v=venUqnl8cE>

The screenshot shows a Windows Internet Explorer browser window. The address bar contains the URL <http://www.youtube.com/watch?v=venUqnl8cE>. The main content area displays a YouTube video player with a black background and white text that reads: **DEVI MAHATMYAM**, **Part-36**, **Kshama Prarthna**, **Ramesh Natarajan, GRD Iyers**, <http://grd-iyers.web.officelive.com>, and **Mississauga, ON, Canada**. The video player controls show a progress bar at 0:02 / 2:19 and a resolution of 360p. To the right of the video player, there is a 'Suggestions' section with several video thumbnails and titles. The Windows taskbar at the bottom shows the system tray with the time 12:35 PM.

- 2) Open another webpage. Type the following web address in the blank address bar or click on the link to take you to the new webpage for <http://www.video2mp3.net/>

You will be taken to the following website. Now copy the youtube link and paste it into the **blank field** provided below **“Enter the URL of the video...”** and then click on **“High Quality”** and then click on **“Convert”**

- 3) The process will start activating and you will see the file being converted. This may take a few seconds and you may even see a message saying “Waiting in queue” etc. Once the process is completed, you will see the following screen. Click on link below **“Conversion Successfully completed”** that says **“Click here to download your converted file”**

- 4) You will find this screen once the conversion is complete. The next step is to download the MP3 audio file by clicking here:

- 5) Now click here to save your file. You need to choose a folder on your computer to save it to.

Note: The whole process takes only 10 seconds. You can continue saving files in this fashion! Enjoy !
